

## Correct "Sunburst" Design on 5-2 Wheels

One of the things I have received many requests for over the years, is the "sunburst" design used on the 1936 DeSoto's wheels. It is difficult to explain in words what it looks like. Some weeks ago, I took an original wheel that I have and photographed the design.

The paint on this wheel is "Autumn Gold" with "straw color" and "Chinese red" stripes. The straw color sunburst stripe is  $\frac{3}{8}$ " wide, and the bisecting red stripe is just a "hair line". The double stripe that goes through the valve stem hole is  $\frac{1}{16}$ " wide.

Hopefully, the photographs will allow your restoration efforts to be correct.
