

TECHNICAL Tips

cause we all have questions!

The Airflow Forum, offers Helpful advice from Doug Conran and John Spinks regarding Axle Seals and Tail Light pins.

Source for Axle Seals.....

We are looking for a source for new rear inner and outer axle seals, differential pinion seal and transmission rear seals for 1934 Chrysler Airflow CU without OD. We had to tear down our differential after an axle shaft broke and need these seals to get back up and running. We would really like to find NEW rather than NOS as we have not had much luck with many of the NOS items that have rubber on them. Ray Corder, Brookville, OH

Dear Ray

Larry Chegwiddden of Portland, OR may be able to help you. Phone 503-253-8941 after 8 PM Pacific time. Address is; 6826 SE Stark ST. Portland, OR 97215. From ad in WPC Magazine.

Doug Conran, Benton Harbor, MI

Bent Pins Question.....

Does anyone know of a source for the little bent pins that hold the tail light lenses into the tail light housing ring? These are force fit into the lip around the ring and exert force on the lens to hold them in place. I believe each one takes 3 pins? I need of all six, but could get by with 3-4. I can imagine they are pretty scarce, so has anyone ever made them from scratch? Thomas Cave, Santa Maria, CA

Hi Tom,

If you draw a blank on this one the small clips can be made

from high tensile wire. If you need a set made please let me know and I will find time; somehow, to make them for you. How much time do I have for this? I will post a photo of the offending pieces under; "When you are desperate for parts" in the Photos Section (Yahoo) so as to confirm that this is what you need.

Cheers, John Spinks, Pakenham, Victoria, Australia

AIRFLOW CLUB INTERNET FORUMS

The Airflow Club participates in two internet forums, one hosted by the AACA and other hosted by Yahoo. The easiest way to reach the AACA Forum is to go to the Airflow Club Home Page at <<www.airflowclub.com>> and at the bottom of the page click on the AACA Forum address. If you want to access the forum directly, their address is <<<http://forums.aaca.org>>>. Then click on Forums. This opens all the forum lists. Click on Register Here and register

as a forum member, then scroll down the list Airflow Club of America in the Chrysler Products group.

Yahoo also host a forum for us. To access their forum go to <<<http://auto.groups.yahoo.com/groups/Airflow>>>.
