

"The clutch to use is Chevrolet #3869183, which fits various V8's from 1965 to present. This disc is available in the after-market as Dueco CD 3735. There are perhaps ten other Chevrolet parts number discs that will fit, but they are less common, and may give problems. For instance, I have a Dueco CD 3348 on my car, which is a heavy duty version of CD 3735, and the clutch hub is so large that I have to have about 2½" of free play to keep from pushing the fingers into the hub, but with the CD 3735 disc, there would be no problem."
