

Airflow Club Jacket Update

March 31, 2023

Front logo detail

Back logo on Jacket A

Front view of Jacket B in XL.

Front view of Jacket A in XL. I wear a 44L or 46L suit.

Inside of Jacket A. Embroidery requires the white backing, and note there is no lining.

Back of Jacket B

Inside Jacket B. Lining is lightweight and soft.

Prototype embroidered Airflow club jackets have been made and I now have current prices. There was concern that embroidery could cause jacket shell puckering, but that appears to be very minor. Supply chain problems still plague the apparel market, with the result that some colors and styles are not available at any given time and prices may be changed several times a year. Therefore, prices quoted here could be changed. But for now, I can accept orders until June 15, 2023. At that time I will order another batch.

PRICES

There are two jacket models, one is [Port Authority J305](#) (A) and the other is [Sport-Tex JST70](#) (B). (The names are links to the jacket specification pages on www.sanmar.com so you can get full details.) Jacket A is an unlined windbreaker in True Navy. Jacket B is very similar, but is lined with a tee-shirt like jersey material. Both have polyester shells. There is a Ladies version (L305) of J305 but I don't yet have prices for these. Email me if you need want one and need details.

Assuming a minimum of 20 jackets, the cost of embroidering them is \$14.25 for the back Airflow Club of America script and \$10.25 for the front Airflow Club oval logo. The prices quoted below include the jacket, decorating options (I recommend both front and back), and California sales tax (rounded up to the next dollar). I can ship them priority mail for \$11 additional in the US if you provide your shipping address and pay the postage. If you would like to order one or more, please fill out the order form below and send it to me with your check.

Note that I don't have a resale license and my offer is to buy one or more jackets for you and send it USPS priority mail. The price reflects the actual cost of the items including tax I have to pay and it might change if the costs go up or down. That said, I doubt prices will move more than a dollar or two in the next couple of months. My hope is getting these into public view will ultimately be good for the Airflow Club. Please email with any questions.
