555	724572* cloth	720809 HB-10A colonial grain		474749 color 366	723749		C9, C10. Gray?

345 and **555** are evidently cloth using different, new-for-1936 fabrics.
345 only available in C10.
The other 5 trim codes specify 4 leather interiors, each apparently using moleskin for headlining. Where carpet color 394 is used, it is twice noted "leather fabric". This might refer to the edge binding used.
345 color not specified, but carpet was the same as in HB 10A (taupe) cars.
430 leather color not specified but uses the same leather as 1937 430, which is tan
555 color not specified, used different carpet from 345
No mention of interior trim for Lebaron cars, C11 and CW — apparently the interior trim was custom for each car.

Only three trim codes are listed for SG: 420 leather, 324 broadcloth, and 277 pile
324 cloth, also lists leather hides 361986 as a component
277 pile uses same cloth on upper body and headlining.
420 leather uses different color carpet from the others.

Parts list flags some but not all leather components as Export. Many of the codes are common with Chrysler but differ in carpet and headliner. Not clear where imitation leather was used; possibly on not-visible portions of seating cushions.. Moleskin appears to have been an alternative to headlining.

Not entirely clear what Colonial grain leather looks like, but this Colonial leather grain photo was found on the web.
